

OVERVIEW

Grades 3-8 Summer School Curriculum

Our Grades 3-8 Summer School curriculum is a custom design based on your district needs by grade level. If you choose to use our STAAR materials for summer school you will need to review the Choices for Lessons for Grades 3-8 and choose 10 of the Lessons based on the weaknesses of your students and the amount of instructional time for your summer program. NOTE: if you choose more than 10 lessons there will be an additional charge for each lesson.

You will also need to choose 20 Spiraled Practices from the Choices for Spiraled Practice. If you choose more than 20 there will be an additional charge. Intent for the Spiraled Practice is to revisit all grade level TEKS, not just the ones chosen for lessons – the Final Assessment includes all TEKS assessed on STAAR.

When the custom design is complete you will receive a Teacher master that includes the Lessons, Spiraled Practices, Problem-Solving Projections, Cardstock Masters and Final Assessment. You will also receive a Student Materials master that only includes the pages that need to be printed for summer school students.

Please let me know if you have additional questions.
